EDUCATION

University of Massachusetts Amherst

Bachelor of Science in Computer Science

Amherst, MA

August 2023 – May 2026

EXPERIENCE

Software Engineering Intern

May 2026 – Present

W. R. Berkley

Remote

- Modernized Nautilus NEST and ONE insurance platforms by developing .NET/Razor APIs that unified policy and claims data access through a single internal platform
- Built CI/CD pipelines for .NET/Razor backend services, enabling automated deployment of record-retrieval and integration APIs

Undergraduate Researcher

May 2026 – Present

Adam O'Neill Research Lab, UMass Amherst

Amherst, MA

- Investigating distance-comparison-preserving encryption schemes for privacy-preserving retrieval and RAG systems, including evaluating membership inference attacks against encrypted embedding databases

Cloud Engineering Intern

May 2025 – August 2025

Johnson & Johnson

Raritan, NJ

- Built a Kubernetes monitoring dashboard for engineering teams using Prometheus and Grafana alerts on AWS EC2 to reduce manual cluster health checks
- Built a retrieval-augmented documentation assistant used by the MARVEL engineering team, indexing roughly 5,000 pages across Confluence and Databricks, reducing documentation search time by over 50%

Technical Founder

September 2021 – February 2023

SecureDAO

Remote

- Founded and led a DeFi protocol on Fantom hosted on AWS infrastructure, peaking at 2,500+ users and \$300K in assets under management
- Scaled platform valuation to \$3M through product growth, community operations, and social media distribution

LEADERSHIP EXPERIENCE

Blockchain Club President

September 2024 – May 2026

University of Massachusetts Amherst

Amherst, MA

- Revived and restructured the Blockchain Club, leading workshops on Web3, DeFi, smart contracts, and EVM development

Ecommerce Store Owner

July 2023 – February 2026

SilentBball

Remote

- Operated a direct-to-consumer ecommerce brand that generated 4M+ impressions across Instagram and TikTok

PROJECTS

Medical Billing Agent | Python, Docker, Qdrant, Firecrawl, vLLM

June 2025 – September 2025

- Built an AI-powered medical billing workflow using MedGemma-27B with vLLM inference to automate claim analysis, denial review, and appeal generation – operated under SOC2 and HIPAA compliance requirements
- Developed a retrieval pipeline over thousands of medical documents using Firecrawl and Qdrant vector search
- Implemented tool-calling workflows with REST APIs for policy lookup, denial analysis, and appeal generation, adopted by 10+ medical practices after project handoff

Scenic Route Optimizer | Python, PyTorch, Mapbox, OSMnx, Hugging Face, AWS (S3)

May 2025 – Present

- Built a scenic routing engine scoring road segments from satellite imagery and terrain elevation using PyTorch, Mapbox, and OSMnx, deployed on AWS EC2 with S3 for geospatial data – generated 5,000+ training examples and scenic heatmaps

TECHNICAL SKILLS

Python, JavaScript, Solidity, Java, C++, SQL, PyTorch, Hugging Face, vLLM, Qdrant, Firecrawl, pandas, Docker, Kubernetes, Prometheus, Grafana, AWS (EC2, S3, API Gateway), Git, SOC2, HIPAA
