PROFESSIONAL EXPERIENCE

Healthcare Tech Corp

Lead Infrastructure Engineer

[REDACTED LOCATION]

January 2025 - Present

- Architected robust CI/CD pipelines leveraging ArgoCD and Docker, streamlining deployment processes and enhancing operational efficiency within a Kubernetes environment.
- Engineered a scalable multi-cloud infrastructure utilizing Kubernetes, implementing Infrastructure as Code with Terraform while adhering to best practices for cloud security and compliance.
- Designed and implemented secure machine learning pipelines within a Kubernetes ecosystem, utilizing AWS security services and IAM policies to protect sensitive healthcare data.

Energy Global Enterprise

Senior DevOps Architect

[REDACTED LOCATION]

January 2024 - December 2024

- Engineered production-grade Kubernetes clusters on GCP, utilizing Terraform to drive a 40% reduction in infrastructure costs while enhancing scalability for AI/ML workloads.
- Streamlined model deployment processes by building CI/CD pipelines with Kubernetes, Kubeflow, and MLflow on GCP, reducing deployment times from weeks to hours.
- Implemented SRE principles to achieve 99.9% uptime for distributed AI/ML workloads, enhancing system observability with Terraform, Helm, and GCP-native monitoring solutions.

Retail E-Commerce Corp

Senior Cloud Architect

[REDACTED LOCATION]

February 2023 - January 2024

- Led a 60% reduction in cloud expenditure by restructuring and optimizing GCP accounts, utilizing Terraform to automate provisioning and significantly enhancing DevOps efficiency.
- Architected multi-cloud Kubernetes infrastructure, boosting scalability and performance for containerized applications across development and production environments.
- Established and maintained CI/CD pipelines in GCP with ArgoCD, streamlining deployment workflows for JS/Node applications and fostering a strong DevOps culture.

Digital Media Agency

Senior DevOps Engineer

[REDACTED LOCATION]

January 2021 - December 2022

- Architected and provisioned scalable AWS and GCP environments using Terraform, enhancing infrastructure reliability while integrating Kubernetes and Docker for efficient container orchestration and Postgres for robust data management.
- Developed and integrated GitLab CI/CD pipelines, automating build, test, and deployment workflows for Node and JS applications, accelerating software delivery cycles by 30%.
- Implemented comprehensive monitoring and alerting with GCP Stackdriver, significantly reducing downtime in containerized production environments through proactive issue resolution.

IT Managed Services Provider

Managed Services Lead

[REDACTED LOCATION]

January 2019 - January 2021

- Drove DevOps transformation by optimizing multi-cloud infrastructure with Terraform, enhancing compliance with HIPAA regulations while improving efficiency in K8s and containerization initiatives for Medical Data and Computer Science applications.
- Elevated deployment capabilities by architecting cloud-native CI/CD pipelines using GitLab CI, streamlining build, test, and deployment processes for fullstack JS/Node applications and Postgres databases.
- Standardized environment provisioning and task automation through Python and Go, fostering compliance and operational efficiency across cloud deployments for managed services clients.

Domain Solutions Corp

Solutions Architect

[REDACTED LOCATION]

January 2017 - December 2018

- Drove infrastructure reliability and scalability enhancements across multi-cloud environments by implementing Terraform and ArgoCD for automated provisioning, optimizing CI/CD processes with Docker and Kubernetes.
- Facilitated the integration of Kafka for real-time data streaming, significantly boosting application performance and responsiveness in GCP-managed environments.
- Automated infrastructure management processes using Terraform and Kubernetes, ensuring compliance and operational efficiency across regulated environments while minimizing manual interventions.

EDUCATION

State University

Bachelor's, Computer Science
